

DELAPHOS® RANGE AND REACH

All customers and agents for the Delaphos® range of Zinc Phosphates will be aware of the implications of **REACH** (Registration, Evaluation Authorization and restriction of Chemicals) which is already adopted within EU and national legislation.

JPE, as manufacturers and suppliers of Delaphos®, have successfully completed registration for zinc phosphate with **ECHA** (European Chemicals Agency). For a copy of the submission report (Ref 01-2119485044-40-0005) confirming this, refer to the separate download on this same webpage.

Based on our current understanding of the REACH protocol, and the Sector Uses, Process Categories, Product Categories and Environmental Release Codes enquired of by our customers to date (See separate download “Delaphos REACH Categories”), we do not expect the REACH authorisation to affect continuity of supply of Delaphos or its application within industry. You can find on this page the categories and codes we expect to be covered for zinc phosphates in the REACH process. If you are aware of any others that are not listed, please let us know immediately and we shall seek to ensure they are added.

Please also note that we have modified our packaging to reflect the associated changes with CPL Regs and the MSDSs which are also available as downloads in a variety of languages on the “Products” page.

Should you have any further queries please do not hesitate to contact:

Stef Price
Director
